ICG is Proud to Present

The "King of VAMs"

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

Dealer set-up at the Long Beach Expo was very active with transactions taking place all over the bourse. Most dealers that we talked with were encouraged by their ability to do business. Those looking to buy found a wide selection of material to choose from and if they were willing to pay today's strong price levels then a deal would be completed. Dealers that have a strong inventory were also happy as they had a ready stream of prospective buyers waiting to get "first shot" at their material. One east coast dealer was very pleased with his purchases. He was able to buy approximately 200 coins during dealer set-up with 90 percent of the coins being in the better date category. He was especially seeking Morgan Dollars to fill standing orders from his customers. Carson City, Deep Mirror Proof Like and key dates were the main objects of his demand. Some of his acquisitions included: an MS63 and MS64 1890-CC, an MS64 1879-CC, 1886-S in MS63 DMPL, 1885-CC in MS65 DMPL and two 1893-S Dollars, a VG10 & F15. Dealers specializing in Morgans believe they are catching up (in price) to their true scarcity. There are a lot of collectors struggling to fill their sets because the coins just aren't easily found. These buyers are chasing after primarily white coins. Supplies of "CCs" are a bit scarcer because the coins are being graded by NGC in their original GSA holders and collected as such, according to one dealer. Besides Dollars, strong activity is targeting Standing Liberty Quarters, Walking Liberty Half Dollars, Buffalo Nickels and other popular series. Key and semi-key dates are the most sought-after with collector/investors willing to spend strong money for nice coins. A 1926-D Standing Liberty Quarter in MS64FH changed hands on the bourse for $10,000. Rare date Gold coins were another stellar performer during the initial day at the Expo. Specialists in this area told us that there seems to be a carry over of demand from the August ANA. Charlotte and Dahlonega Gold priced **under** $10,000 is hot. So are "CC" $20 Liberties. Also among $20 Liberties the better date Type I and Type III issues are especially sought-after. Collector/investors are generally looking for rare coins from $5,000 thru $20,000. One dealer was very happy as he was able to buy two early Double Eagles: an AU55 1871-CC for $28,000 and an MS63 1854-S for $11,000. $20 High Reliefs in any grade were also attracting a lot of attention on the bourse. Another Gold specialist was pleased with his wholesale business for the day. He was able to sell approximately $150,000 in rare date Gold. Several dealers are on the floor ready to buy with money in hand. These dealers will also be looking to add some rare date Gold from the SS *Republic* Shipwreck. Due to the extraordinary market demand, these coins are being released before the excavation of the site is complete, making their debut at the Expo. Several dates of $20 Double Eagles from 1850-1865 are available including: 1860-S, 1861, 1863, 1865 and 1865-S. They are graded by NGC with special labels in grades ranging from AU53 thru MS64. A limited number of $10 Eagles are also being offered, including: 1841, 1843-O and 1856-S. One primary wholesale distributor said, "these beautiful treasures will not last long, they have been selling briskly."

The September 6-7 Pre-Long Beach Auction by Goldberg C&C and the September 5-7 Superior Pre-Long Beach Elite Coin Auction each claimed approximately $4.1 million. We listed a few certified highlights from each sale.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

SLQs, Type, & Commems Push Higher
A Change Of Pace For Autumn?

The Long Beach Expo held September 9-11 in California concluded with many dealers telling us that they had a "good" show. Some were complaining that the length of time between major shows has shortened causing them not to find as much new material as they had hoped for. Still, coupled with the public auctions that surround this show as well as by the coins offered from the public, it has become necessary to attend. Many dealers are still waiting to get fully paid for coins that they have offered to their best customers. Also, coins that are offered to other dealers (on memo) in route to other collector/investors are also pending. These funds are desperately needed by dealers trying to post strong Bids at auction and/or on the bourse at shows. Dealers must have solid credit to be able to take advantage of any special coins or deals that may come their way. They need to be on top of this fast-paced market if they hope to maximize their profits and benefit from the additional sales that are generated by it. Consequently, they will try to free-up some extra cash by blowing-out coins that have become stale. They will then look to add coins that they believe will have a better chance of turning over. We also agree with some dealer's assessment that the market has cooled down a bit from the furious pace set earlier in the summer.

The sight-unseen market is still doing well overall as the fall season quickly approaches. Dealers that need material quickly are still posting strong Bids for select areas of the market that continue to move in a positive direction. Type has been mentioned quite frequently throughout the summer as one area receiving strong demand and Type is still generating a large amount of support and quite a few higher Bids. The percentage increases in Bid may not make the headlines but we know that want lists are waiting to be filled. Most of the percentage increases to Bid are relatively small but Liberty Seated Dimes with Legend increased by more than 10 percent for both NGC and PCGS examples. Dealers are targeting 3-Cent Silver pieces, Bust Half Dimes, Liberty Seated Dimes & Quarters, Barber Dimes and 20-Cent pieces. Bids are generally below $5,000 with the majority being below $1,000. Dealers are comfortable buying coins at this level because they are so readily salable to collector/investors. These particular denominations and designs are also desirable and challenging for dealers to locate. Proof Type is also active with Bidders looking to add many denominations from this category. Trade and Morgan Dollar Proofs each turned in greater than 10 percent Bid increases with Trade Dollars topping 13 percent. Silver and Gold Commemoratives are enjoying a continued surge in popularity. Dealers at Long Beach told us that many collector/investors are thrilled with the quality of material they are receiving for the money. Commemoratives are believed to represent an excellent value and the Bid increases are reflecting this growing perception. Dealers say that there is enough Gold and Silver Commems priced below $1,000 to make many a collector happy. The Maine Centennial jumped approximately 10 percent this week in several grades and it is still priced at **only** $100. The interest in Commems will probably continue as the Mint's State Quarter program does. $20 Saints and Standing Liberty Quarters were impressive with several issues from each series jumping greater than 10 percent. Morgan Dollars remain strong overall with 1893 jumping 36 percent in MS64. Discounting was also evident in the sight-unseen market. We did mention that dealers noticed the market backing off its torrid summer pace. Profit taking, inventory overhaul and the need to raise some cash played a role in this area of the market. Select Proof Singles, Generic Gold, mostly later date Walking Liberty Halves and a few Buffalo Nickels all declined this week.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

ATTN Mr. Dale Larsen

Dear Mr. Larsen

I thoroughly enjoyed our pleasant conversation of Thursday June 19 of this year. As a novice coin collector I have purchased some coins that I wish to sell.

I had decided to use Spectrum because of the fine reputation that the company has in the numismatic industry.

Speaking to you last week merely reinforced that opinion. You were very honest and forthright and I value the advice that you gave me. I hope this transaction is one of many to come in the future.

Sincerely yours

J.H.

It's good to be back.

From dealer to grader, now back to dealer, exciting times are here.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

I am proud to announce the launch of my new company, John Maben Rare Coins (JMRC).

In case we have not met, I have been in the coin business since 1978, with the last 8 years grading at NGC and 7 of those as a Grading Finalizer. Over the years, I have purchased tens of millions of dollars worth of coins, and graded and authenticated millions of coins to the highest industry standards.

And now, with the opening of JMRC, I have set my sights on being a coin company that reminds people of the good old days, when things were far less complicated. By that, I mean we are here to deliver a complete range of beginning-to-end services that assist other dealers, advanced collectors, and investors in maximizing their returns when buying and selling coins. No hyper-specialization, no investor-only or dealer-only emphasis.

JMRC is a well-rounded, full service company you can trust, and enjoy working with on a regular basis. Simply put, I would like to put my years of experience to work for you in those situations where you need definitive answers and a "total numismatic solution."

If you are selling and looking for the "right" company to assist you in an orderly disposition that will maximize your profit potential, JMRC is here to provide the one-stop services you need. If you are building a collection or portfolio, and would like professional guidance from a knowledgeable and trusted source, JMRC is here to serve you.

Consider that, as President of JMRC, I am uniquely qualified to offer you all of these benefits:

- Advice on a coin you are thinking about buying for a significant upgrade. Who better to ask?
- Direction on a coin where professional conservation care might make all the difference. As a key contributor both conceptually and materially to the formation of Numismatic Conservation Services (NCS), the only firm of its kind, I have extensive experience in evaluating coins as candidates for conservation.
- Extensive contacts and decades of experience that will assist in obtaining top dollar when selling.
- Relationships with major auction companies that allow me to negotiate for you when consigning, and to make representation on your behalf when buying.
- Assistance in determining how much to bid on individual coins and collections.
- The ability to put together and finance any size numismatic deal.
- A recognized "eye" for precision grading that is nearly unrivaled, even among professional graders.
- The convenience of our close proximity location to NGC and NCS, in the Sarasota, Florida area.

Whatever your needs, JMRC is here to help you buy and sell more coins, more profitably.

Type Jumps But Still Lags Behind The Market
Baggy Generic Morgans Up

We are closing out September with the rare coin market continuing to show positive signs. Dealers agree that the current strength is not what it was following the hectic July and August period but things are doing fine nonetheless. The market is still digesting a lot of the coins that have been purchased earlier, at public auction and on the bourse at coin shows. This situation is primarily due to the buying frenzy that took place at the ANA and other shows and sales that were held in conjunction with them. When all the dust cleared it was apparent that the market spiked higher, continuing its general bullish direction that has been with us throughout 2004. All markets are ripe for a breather after a strong run-up and the rare coin market is no exception. This is just a healthy aspect of most bull markets. As we said, dealers had to process all the coins that they bought and pay the bills that were coming due. Consequently, the cash flow position of many of the players was strained and so they weren't as willing to commit more funds as readily. According to one dealer analyst, the market just took a "pause." The continued depressed stock market, relatively low interest rates and an economy that can't be called robust has helped collector/investors place orders for rare coins without hesitation. Of course the continued strength and direction of the Gold and Silver Bullion markets has not hurt the coin market either. Gold seems to be maintaining its position above $400 per ounce and some believe that it may be threatening to break out of its trading range and push even higher.

Meanwhile, collectors and investors are still making healthy purchases and so dealers are trying to buy those select coins where sales are imminent. Coins valued at $10,000 and less seem to be the coins of choice. This appears to be the current threshold of today's buyers. Coins priced above this level are a bit tougher sale today than seen earlier in the year. Buyers are actively pursuing nice Lincoln Cents, Buffalo Nickels as well as the rest of the more popular series. Key and better dates command their attention as dealers struggle to maintain an inventory that sufficiently satisfies this demand. Gold coins, especially early Gold continues to generate strong sales. Type coins have been improving of late. However, "In terms of investment, Type has lagged the market," according to one dealer. We know that dealers generally have an easier time putting their customers into anything Gold compared to a common MS65 Liberty Nickel or a Brown Two-Cent piece in PR64. Of course the story is a bit different when the subject is early Flowing Hair or Bust Type. These areas of Type are nearly always easier to place with clients.

The sight-unseen market for Type is continuing to catch-up with many higher Bids hitting the Mint State and Proof Bid columns. Be sure to notice the 233 issues advancing this week alone. Dealers believe that current levels represent good value and these coins may really start moving if Bidding competition increases. Sight-unseen Bid increases have hit Liberty Seated Type in a big way. Barber Type is also moving higher. Three-Cent Silver Type, Proof Morgan and Trade Dollars along with select Mint State Large Cents are also participating. Yet, when it comes to the number of recently **completed** sight-unseen transactions thru the dealer-to-dealer trading networks, Walking Liberty Halves take top honors. The higher grade late dates of this series may have hit a plateau, judging from the number of Bids being hit lately. Strong sight-unseen Bids are now chasing generic Morgan Dollars in low Mint State grades. Earlier this pattern developed for Silver and Gold Commemoratives and now a similar scenario may be beginning for Morgan Dollars. At the same time the better dates of the Morgan series continue to do well. Generic Peace Dollars in MS65 are now Bid $100 sight-unseen for both NGC and PCGS. Minor discounting is also evident in the sight-unseen market. Dealers are still finding it necessary to "blow-out" some material to raise cash.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels *www.ccdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" – Lowest asking price during the week prior to publication (week old); "m" – Lowest asking price during the previous three weeks (month old); "t" – Trade during the most recent month; "lm" – Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder
In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Market Strengths And Weaknesses
Dealers Prepare For October Auctions

October has begun and it doesn't seem possible for dealers to feel any better about the rare coin market than they already do. Most of them that we speak with say that things are "as strong as can be." However they do acknowledge that a slow-down has occurred somewhat following the hectic pace that was established during the summer. Still, it certainly hasn't been **that much** of a drop-off, as levels are holding up and strong sight-unseen Bids are still being placed. One dealer commented that when he sees one area of the market dip, another takes off. It is just a case of today's knowledgeable collector/investors searching for areas of the market that haven't appreciated with the same intensity and percentage gains as others. Prudent buyers are looking and searching for coins that offer excellent potential at current levels.

Of course, the break-out in the precious metals have also done their part by creating more interest in coins. Gold may have finally escaped its trading range by busting out above $410 per ounce. Silver has followed suit by jumping in value to settle above $6.90 per ounce. If the metals become increasingly active and receive more national press, many will expect to see an increase in interest for rare coins. As the public begins to clamor to own bullion bars and coins some will want to own rare coins too.

Auctions still play an important role in the marketplace by providing those coins that don't appear as frequently as is currently needed. October will be busy for dealers in that department. First, Scotsman will conduct an auction October 8 in Saint Louis, Missouri. Next, American Numismatic Rarities will offer the Dr. Byron C. Pevehouse & Lester Gann Davis collections October 11 in New York City. Stack's will conclude the week in New York with selections from the John J. Ford, Jr. Collection followed by their 69th Anniversary Sale October 12-14.

The sight-unseen market remains active with dealers still trying to capture coins for their customers and inventories. They are selectively aggressive by posting higher sight-unseen Bids for coins that they need. You may notice that the number of plus signs within our Bid columns are not nearly as numerous as they have been several months ago. Still, dealers do agree that many of the previously seen gains have not been relinquished. We do note that there are some areas being hit by some discounting. In some cases these areas have been harder hit than may appear at first glance. The Walking Liberty Half Dollars are one of those popular areas of the market that has suffered some declines. More than two dozen Walking Liberty Halves have sold **below** sight-unseen Bid in this week's Heritage Internet auction. These coins primarily represent the short-set dates of the series in grades from MS65 thru MS67. However, it's not just Walkers that did poorly, several Buffalo Nickels and Morgan Dollars have been hammered down below Bid as well. Nearly 100 lots sold for as much as 65 percent below existing sight-unseen Bids. These lots represent **opportunity** for those willing to do what it takes to cash-in. They may also represent **money lost** from sellers not paying attention and or not receiving the proper advice. In addition to Heritage and Teletrade, David Lawrence Rare Coins of Virginia is now holding regular weekly Internet auctions.

The market appears to not be gaining as much ground lately as collector/investors leave one area for another. One of the areas that has benefited from this exodus is Type. Mint State and Proof Type are displaying several plus signs from higher sight-unseen Bids. Interest is spread from Flowing Hair and Bust coinage among business strikes to 3-Cent Silver thru Dollars struck in Proof 63 and better. Proof Gold is also advancing. The smaller denominations are in demand with $1, $2½ and $5 Proof Gold sought-after. Besides a few lower Morgan Bids some bright spots are present. Two keys, 1894 and 1879-CC made strong advances. These are among the select group of better dates that always seem to command strong interest. Silver Commems are mixed and Gold Commems display a few minus signs.

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

When it's time to sell...

JMRC will get you the best price for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

Prooflike Morgans Grab The Spotlight Precious Metals Help Push Market

Activity and interest in certified rare coins is continuing to increase within the **sight-unseen** market. Sight-Unseen trades are occurring in a number of areas from a plethora of generic MS63 Dollars to 4- and 5-figure rarities including Bust Dollars and better date Walkers. Many dealers are turning to the electronic dealer trading networks in hopes of acquiring material. Simply, coins are needed and they are needed in a hurry. The recent spurt in precious metals has certainly provided some additional stimulus but in any event, the sight-unseen market is doing very well. Gold Spot continues to impress analysts, especially with its recent vault over the $410 per ounce level. Silver Spot has been even more spectacular than Gold as it climbed above the $7 per ounce plateau before settling this day at $7.20. The bullishness in the precious metals is good for the rare coin market and if this trend continues, the market should be heading for a solid final quarter of the year. Yet, it is still too early to write that chapter as we have nearly three full months to go.

Many areas of the rare coin market are in motion these days, and for the most part that motion is headed in a positive direction. Dealers have increased their Bids for many series and denominations as they need coins to sell to their customers. Several of the coins increasing today are still considered to be undervalued based on populations and availability. Just knowing which coins are undervalued solves only one part of the problem. Dealers are aware of how acutely difficult it is to actually find and purchase the coins. That's why you are seeing plus signs occurring for many areas such as Lincoln Cents, 2¢ pieces, 3¢ Silver, Shield Nickels, Buffalo Nickels and all three Barber denominations. Key and semi-key dates within these series remain highly sought-after. The increasing demand for these coins is a result of increased knowledge passed on to collector/investors from dealers. Growing customer want lists still contain many of these coins and even if a dealer doesn't have an immediate buyer, he or she knows that these coins would still make an excellent addition to one's inventory.

The sight-unseen market is following the lead of the sight-seen market by strengthening in various areas. Walking Liberty Half Dollars immediately come to mind with at least one dealer continuing to post several strong **sight-unseen** Bids on the trading networks in an effort to buy some of the series toughest and rarest specimens. Success came quickly as he was hit for two rare dates. The 1916-S in PCGS MS67 sold at $40,000 and the key, 1919-D changed hands in PCGS MS66 for $250,000. Early key and semi-key date Walking Liberty Half Dollars remain among the most challenging of all the more popular market segments. In the high Mint State grades it is especially difficult, both in the hunt and in the ability to pay the steep asking price.

Morgan Dollars, an always extremely popular series, has continued to make its presence known. Strong sight-unseen Bids are taking place for **Prooflike** specimens. Dealers are recognizing them as being undervalued, especially in relation to business strikes as well as to their DMPL counterparts. These two areas of the Morgan series have increased substantially leading the way for an impressive surge of plus signs in this week's Bid columns. The heaviest concentration of increases is found among the Carson City Dollars but it is the 1889-S that made the largest percentage gain, up over 100% from last month in NGC 65PL. Mint State and Proof Type are still receiving a generous amount of attention from Bidders that is translating into plus signs. Demand for Type continues to dominate both the sight-unseen and the sight-seen markets. Dealers have many collector/investors working on Type sets of all kinds and those dealers that have an excellent selection of Type in their inventory are in a good position. Buyers are looking for material graded 63 and better for Proof and business strike issues. Interest is keen for 3¢ Silver and some Dimes. Liberty Seated and Barber coinage also remain very popular with Type seekers. Bidders are very content to accept either NGC or PCGS examples when it comes to Type. Gold Type has also increased following Spot's lead. Silver Commems shouldn't be left out of the mix as plus signs are crowding several Bid columns, especially on the NGC side. Grades from MS64 thru MS66 are preferred as dealers find this dollar range and value attractive for their customers. Take note of some continued weakness found among Proof Singles.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Dear Dale and John:

I'm unable to forget your handsome faces, what with Dale's note and card, plus the way you two keep appearing in Numismatic News and Coin World.

You can count me in as another satisfied customer. And the $72,000 is already being spent on world silver, plus a few other indulgences. You're a good team and enjoyable to be around.

Keep smiling.

Sight-Unseen Market Takes A Breather

Could cash-flow problems be at the root of some negative signs creeping into the sight-unseen market? All markets become ripe for profit taking at some point and if it isn't one thing taking responsibility then it's another. Regardless, dealers have begun to observe "a bit of a slowdown" occurring in the sight-unseen market as we hit the middle of the month. Several astute dealers have detected that other dealers have "pulled their Bids" from the electronic dealer trading networks. Why? Have they already filled their outstanding orders or has the current demand for these coins changed. It is common for dealers to routinely add or delete their Bids and it may not mean that a market correction is imminent. It is however prudent for dealers to be in a strong cash position prior to major shows and auctions such as the $844,000 generated at the Scotsman auction in St. Louis, MO October 8 and the more than $3.28 million hammered down at the American Numismatic Rarities auction of the Dr. Byron C. Pevehouse & Lester Gann Davis collections on October 11. (see a few certified highlights listed herein) Also from October 12-14 Stack's conducted Part 5 of the John J. Ford Jr. collection followed by their 69th Anniversary sale featuring the Betty Goff C. Cartwright collection. These final sales totals were not available at press time. As previously mentioned, the slight slowdown in the sight-unseen market may be nothing at all and just comes at a time when there were opportunities to acquire some rarities at one of the above referenced sales. Some may view the pulled Bids as a negative while other dealers see the reduction as an **opportunity**. These wholesale dealers realize that they are able to buy more coins, sight-unseen, at lower levels in this particular trading environment. Pulled Bids usually equals less competition and even if they are ready and willing to pay more for the coins, why should they if they don't have to. They can continue to buy quantities and sell a fair amount wholesale to smaller dealers still looking to buy coins.

We have perhaps become too accustomed to the market continuing to accelerate week-after-week. It's not that the market is falling back, it's just not jumping ahead. We do find Silver Commemoratives to be very quiet with a few examples being discounted. Gold Commems are displaying strength with a number of higher sight-unseen Bids appearing for the lower Mint State grades of MS61 and MS62. The market slow-down is really distinguished when you look at the Morgan Dollar Bid columns. It is the **lack** of changes that jump out at you. Where are all the plus signs? Some rare coin analysts believe that the market is simply taking a **"breather."** This is probably true as we still see a lot of supporting Bids maintaining current levels. Mint State and Proof Type have also seen their plus sign numbers decrease. Still, there is select areas of Type that continue to do well. Barber Dimes, Quarters and Half Dollars along with Trade Dollars are all participating in that regard. Matte Proof Buffalo Nickels and Liberty Seated Half Dimes are in demand among Proof Type. A considerable amount of activity and interest is targeting the Gold Type columns. Much of this interest has to be credited to the continued bullishness of Gold Spot. All Gold denominations are increasing in various grades with both NGC and PCGS examples needed. Saints are displaying plus signs as you would expect following a strong Spot but be sure to notice some rarer issues that are being discounted. Standing Liberty Quarters sum up this mixed market with some issues moving higher while others drop. Early Walking Liberty Half Dollars are up with NGC examples being especially sought-after. Dealers know how difficult it can be to find some of these rarities for their customers. Also, a few early Jefferson Nickel Proofs are increasing with gem quality and better examples needed.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UNPRECEDENTED SIX-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual™*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike

When it's time to sell...

JMRC will get you the best price for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XIX No. 43 October 22, 2004 Single copy price $4.00

Mint State Gold Type Glitters
Some Areas Slow Down

We continue to monitor a decrease in the number of plus signs taking place throughout the **sight-unseen** market. Keep-in-mind that interest is still strong in many areas, but the "usual" number of plus sings that we have grown accustomed to seeing in this bull market each week have dwindled. Commemoratives and Morgan Dollars are two areas of the market where the increases have mostly evaporated. For each of these two areas, the number of advancing issues is less than or equal to the number of those that are declining. Also, note that there isn't a single plus sign appearing for Carson City issues. However, key date Morgans continue to attract Bidders with the 1896-S, 1896-O and 1897-O all pushing higher. Silver Commems are a bit mixed but the spotlight remains on the popular Lafayette Dollar where sight-unseen Bids have increased to $2,050 in MS64. Mint State Type and Proof Type are somewhat quiet as compared to recent weeks. However the Type market is still solid with pockets of strong demand evident. It is just that dealers are being very selective when placing their sight-unseen Bids, having to carefully balance their cash flow concerns. Among the more popular areas of the market, select high quality Buffalo Nickels dated after 1927 are increasing. Be advised that several of these same issues have sold at auction in the past few weeks for less, sometimes substantially as seen in the Market columns. Mercury Dimes, Walking Liberty Half Dollars and select Proof Singles are experiencing minus signs as dealers begin to discount stale inventory. It is all about having the funds available for that next big deal. Dealers need to raise some cash and they look towards the coins that have been around with them too long. Many of the Walking Liberty Half Dollar short-set dates in MS65 and better are considered to be prime candidates for this activity. Consequently dealers decide to "blow-out" some stagnant material and serve it up at lower levels (sight-unseen) as a sure-fire way of raising some quick cash.

Strong bull markets have a way of spoiling you during the cooling off period. Most of this week's increasing activity and interest are centered on Gold. Spot has had a very good few weeks with levels near $420 per ounce and it hasn't gone unnoticed by collector/investors. Dealers are also strong buyers as well and for wholesale dealers that spells action. Dealers tell us that they have been very busy trying to buy Gold and one even said that there has been a "frenzy" created in this segment of the market. Analysts point to a combination of forces behind the continued bullish demand for Gold. First, Spot has been increasing and growing in support from an ever believing public that has witnessed its strength above the $400 per ounce plateau. That scenario alone would be good enough for those looking to diversify some of their funds into the Gold market but there's more. This support in combination with the world's oil market hitting new highs for crude, breaking through the $50 per barrel level, has further stimulated the fears of future inflation and desire for Gold. Rare coin dealers, trading sight-unseen, are facing this demand head-on trying to fill the need for generic Gold. Consequently a large number of plus signs are appearing in our Mint State Gold Type Bid columns. These sight-unseen Bid increases for the generics may result in higher Bids being posted for those "dated" Gold coins that are a little bit better than common. Increases for Mint State Gold are well represented with all denominations participating. This advance is the result of the "frenzy" for Gold that dealers alluded to. However, notice that the strongest need is for quality examples grading MS63 thru MS66 trading at $1,000 or more.

Bowers and Merena will conduct the Rarities Sale in conjunction with the Las Vegas Coin, Stamp & Collectibles Show at the Mandalay Bay Convention Center in Nevada. We have listed a few of the many certified highlights from this October 29th sale.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www cdnpublications com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or [illegible] that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "lt" *T*rade appearing *l*ast month; "**ot**" Trade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin s true value may be found in the CDN, albeit on a sight basis.

Gold Takes Top Spot Again
Short-Set Walkers Drop

As of this writing, Gold is trading in the mid $420s, a level not seen since January. It has been a pretty volatile year for the yellow metal trading over $400 per ounce for 23 out of the last 44 weeks. Sight-Unseen Bids for Mint State Type Gold jumped in our last report with strong activity throughout the series. This week we find more of the same as the momentum is only gaining in its intensity. One southern Gold specialist told us that 2004 has been a banner year for his company in terms of Gold sales. It is really quite amazing to learn that his total sales, the number of reorders, and the number of customers have all doubled this year. He credits the continuation of a very active precious metal's market as being the catalyst for this good fortune. All of the positive articles found on the bullion pages of financial periodicals and magazines has helped him to achieve a sharply growing customer base. Many of these new customers are also new to the Gold market. Consequently it is natural to see them buy American Gold Eagles, Canadian Maple Leafs, Mexican 50 Pesos and any other Gold bullion related coins. Once they begin to feel comfortable with this area of the market, a percentage of them will explore and gravitate towards collecting **rare** coins. This is how the market has blossomed throughout the past couple of years and this trend is continuing as the final quarter of the year winds down. Many of these new clients are willing to invest a small percentage of their funds into the rare coin market rather than in certificate of deposits or the stock market. They have become frustrated with the small rate of return on their CDs and from the erratic and volatile stock market. The bottom line is that more people are willing to look into tangible assets and that interest is beginning to pay dividends for coin dealers.

However, it is not an easy road for dealers to travel as several are just trying to keep pace. Dealers are *scrambling* to buy coins. They are trying to meet this demand and satisfy it as quickly as possible. Many have told us that when rare coins are needed quickly, the sight-unseen market is the way to go. This is especially true for Type Gold. Generic Gold can be bought and sold in quantity and in a hurry via this medium. Of course, competition has forced higher Bids and so dealers need to stay aware of their positions. Supplies are still available but not as often or as quickly obtainable as they were only a few short months ago. Just take a look at the top ten percentage increases since July 30th. Gold Type is selling rapidly, everything is trading from low-grade commons to high-grade rarities. Dealers need material and they need it now as you can see from the barrage of plus signs within the Mint State Gold Bid columns. Most denominations are participating with both NGC and PCGS examples posting a number of gains for the second consecutive week. This Gold market is hot! Mint State Type, Proof Type and **early** Walking Liberty Half Dollars are also generating strong Bids. Type continues to realize powerful demand from collector/investors. Flowing Hair, Bust, Liberty Seated and Barber coinage are all highly sought-after. While Silver Commems are experiencing some discounting they are also the beneficiary of several Bid increases. Bids are pushing higher for Texas, Spanish Trail, Fort Vancouver, Oregon, Rhode Island and Cincinnati Commemorative Half Dollars in MS64 and better. However, as we already alluded to, there are areas of the sight-unseen market that aren't doing as well as Type. Specifically, discounting is seen among **late** date Walkers, select Silver Commems, Gold Commems and Proof Singles. Dealers have chosen to back-off in these areas while concentrating their efforts to raise money for other areas. In the case of the 1940-47 Walkers, we see that the strong Bids that were very noticeable in the first half of the year have now practically disappeared. It may be a case where that particular market is now saturated or it just may be a prudent move of shifting funds to take advantage of other opportunities.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Mint Gold Type Active

Selective Strength Keeps Market Heading North

November is just beginning and this is normally a busier time in the rare coin market. Collectors/investors are trying to add to their portfolios before the close of the year and are also looking to buy some coins as gifts for friends and family. This makes some sense but there are also many other factors involved in keeping this market active. The presidential election has just concluded and this allows onc to buy without worrying about economic uncertainty that is with us before knowing which direction the country is headed in for the next four years. Finally, add the strength of Gold and Silver bullion to the equation. Gold and Silver are starting to make belicvers of even those skeptics and it is this bullishness that continues to feed the market with added demand.

Dealers will need plenty of available funds for much of November. First, the new Palm Beach Florida show and auction is attracting many dealers November 4-6. Santa Clara, California will host a Coin and Collectibles Expo Novembcr 18-20. Auctions will take place in New York by Stack's Novembcr 17 and by Superior in Santa Clara in conjunction with the Expo (previews are listed). Highlights from Bowers and Merena's $5.3 million Mandalay Bay Rarities Sale held October 29 in Las Vegas are also listed.

While we don't see as many increases as we did earlier in the year, it is still safe to say that strong **pockets** of dcmand exist within several areas of the market. Silver Commemoratives are an example where we continue to see select issues pushing higher. Commem specialists tell us that there are a lot of customers out there waiting to buy. However, these buyers are trying to stick to a budget and they are looking for specific issues in specific grades. Morgan Dollars are showing demand in several areas including: DMPLs, Carson City, key dates and generics. The collector/investor base among those seeking Dollars remains strong. Dealers are just trying to fill orders as well as to possibly find some elusive examples for their inventory. Be sure to note the huge percentage increases to Bid for the 1878 7 Tailfeather, Reverse of 1879 in MS64 DMPL and MS65 DMPL. PCGS and NGC have only reported approximately 30 examples combined. We even see increases taking place for generic Peace Dollars in grades MS64 and MS65. Mint State Type continues to be a very desirable area of the market. Dealers tell us that customer demand is still very powerful even though this week's Bid columns may look like a ghost town. A few plus signs are found among Liberty Seated Quarters but not much else. Still, this is one the most sought-after areas and dealers are happy to acquire several pieces for thcir customers or inventory. Proof Type is also experiencing a smaller number of increases. Interest this week is targeting **Barber** Quarters and Halves in several grades. There is an explosion of higher **sight-unseen** Bids chasing Mint State Gold Type. This activity seems to mirror the volatility and strength of bullion. Strong demand has given way to increases in most grades except for MS66 and MS67. Weakness continues to bc evidcnt among late date Walkers and select Proof Singles. Of course, select coins from all areas of the market are subject to discounting. Some coins are just being "blown-out," sacrificed so that funds could be made available for an even better cash position.

ICG is Proud to Present

The "King of VAMs"

DISCOVERY COIN
1878

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

Contact James Taylor for an ICG dealer submission kit.

Gold Type Shoots Upward
Higher Carson City Cartwheels

The rare coin market is just plain good. This is true for the sight-seen market and it is definitely being experienced in **sight-unseen** trading. Many dealers remain encouraged by the continued strong overall demand for coins that we are experiencing. There may be a few areas that are showing some signs of softness, but the bottom line is — things are still pretty good. Gold demand is taking the lion's share of the current market activity with the continued upward movement in the bullion Spot price. The desire to buy anything Gold today is the reality with the continued success of increasing Gold bullion levels. As of this writing, Gold is still holding around $435 per ounce. Numismatic Gold coins are the beneficiary of the booming bullion activity as more and more analysts point their clients towards semi-numismatic and numismatic coins. According to dealers actively buying and selling on the bourse and at auction, rare date Gold of all Types and denominations is doing very well with their customers willing to pay strong money for select rarities. One dealer tells us that even expensive Proof Gold is in demand with much support seen at current levels. Of course, those Brilliant Proof examples that have the added plus of receiving the designation of being either Cameo or Deep Cameo can command even greater amounts. The desirability of Proof Gold, due to its rarity, attractiveness and fabulous track record makes it an easy sale to those collector/investors with deep pockets and big expectations. Early Gold continues to fetch strong Bids as well. The buyers of this material, much like the buyers of Proof Gold, have a keen knowledge of rarity and an understanding of coins that represent good value. Sight-Unseen Bids for early Gold is solid for all denominations. A few increased Bids are being entertained for the Classic Head $2.50 and $5 issues. This short-lived design is extremely popular and makes a nice addition to one's portfolio of early date Gold. Better date Liberty Gold is attracting a lot of attention across all denominations. Strong demand was seen for Charlotte and Dahlonega Mint issues at the recently completed Palm Beach Florida show. Nice Extremely Fine thru Mint State examples were gobbled up by a Gold hungry collector/investor public. Carson City, select New Orleans, San Francisco and Philadelphia rarities can also command top dollar today. The $20 Saint-Gaudens series is receiving some mixed signals, although for the most part strength is continuing. We have noticed some discounting taking place for a few select semi-key issues, such as the 1913 in MS63 and MS64. "Prices are settling," according to one expert who also tells us that the overall demand for rare date Saints is great. This dealer added that, "All big ticket Saints are in demand." We know that there are many dealers who would just love to buy any of the Denver or San Francisco Mint examples from 1924-1927. Also Saints dated 1929 thru 1932 continue to attract strong Bids. Many of these late date issues were melted after Franklin D. Roosevelt, in 1933, said that Americans were **not** allowed to own Gold. Late date Saints not released by the Mint, and those that remained in bag quantity in bank vaults were melted. Consequently, those that survived are today's low-pop rarities and remain in great demand. Finally, what dealer would turn his or her back on an 1908-S, 1920-S or 1921? Strong amounts of money await these coins when they become available, either on the bourse or at public auction. Mint State Type was somewhat soft in Florida, according to one dealer although you wouldn't know it by the large number of plus signs that adorn our sight-unseen Bid columns. That dealer also pointed out that some good buys in Type were evident. It seems that other dealers also believe that to be true as well. Morgan Dollars are still commanding extraordinary respect. Carson City issues continue to blaze with increases seen all over the place. Generic and key date Morgans are also participating as well.

Dealers could benefit themselves a great deal if they would take advantage of the opportunities that this market is offering. Consider those certified coins in the weekly internet auctions that continue to sell below their current sight-unseen Bids. The purchase and quick resale of these coins could provide quite an early Christmas present for those that pay attention.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

BOWERS AND MERENA AUCTIONS

When great collections are sold... Bowers and Merena sells them!

The pre-eminent coin auction company of the past three decades, Bowers & Merena has sold hundreds of millions worth of coins, paper money, and other numismatic items on behalf of tens of thousands of consignors. Bowers and Merena has sold four of the five most valuable U.S. coin collections ever formed, including the Louis Eliasberg ($45 million), Harry Bass ($38 million), John Works Garrett ($25 million) and Ambassador and Mrs. R. Henry Norweb ($20 million) collections. In addition, of the seventeen highest prices realized for a rare coin at public auction, Bowers and Merena holds nine of them, including $4.1 million for an 1804 silver dollar sold in 1999. Today, the firm continues its more than 30 year tradition of serving sophisticated, high end coin auction buyers. Contact Steve Deeds at stevedeeds@aol.com

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XIX No. 47 November 19, 2004 Single copy price $4.00

Gold Type Still Surging DMPL "CC" Morgans Are On Fire

The sight-unseen market for certified rare coins remains super strong and continues to move higher even as discounting increases in certain areas. Some of the higher Bids that are being entered are quite decisive, and in some cases with strong percentage increases over last week's Bids (see DMPL Dollars). Before we take a look at the individual areas of the sight-unseen market we need to preface it by explaining what is happening in the overall market. For starters, this is a very busy time of year for dealers as the holiday season begins. A number of auctions and coin shows are in progress. Keep in mind that all of this activity is taking place prior to and will continue thru the Thanksgiving holiday. Many of the dealers that we talk with on a regular basis continue to praise the market. They are pleased with the solid demand and interest for rare coins. Much of the credit for the current success is being given to the precious metals. The metals have surely helped to support the bull market both directly and indirectly. Rare coin dealers are happy to see the metals moving, as this activity keeps their phone ringing and brings new people into their shops. A certain percentage of these hungry bullion investors will go on to buy a rare coin or two. That numismatic demand, although small, is helping to support the already strong levels that have taken place in 2004. Unfulfilled customer want list coins are another reason why many prices haven't backed-off from their highs. Future optimism is another. Of course, we do see occasional discounting as dealers look to maintain a strong cash flow position. They know that it takes a lot of money to be successful at today's highly competitive shows and auctions. Consequently, they are trying to concentrate their efforts and funds towards this end by unloading some coins. Late date Walkers are one area that has been ripe for discounting. Those examples grading MS65 and better have been singled out for quick sale. Their sale doesn't in any way take away from the strong sight-unseen demand that continues for the tough early dates. Select Jefferson Nickel singles are also lower along with some Proof Mercury Dimes. These Proof Singles, like the late date Walkers, are priced to sell in a hurry. Dealers know that it isn't too difficult to replace these "rather modern rare coins" in their inventory when they need to and so they are able to sell them off unhesitatingly. Some common date and slightly better date Morgan Dollars have also been added to this discounting group. Not too many changes are found in Mint State or Proof Type with this report. These areas are holding steady at the present.

Gold continues to go to the head-of-the-class as plus signs blanket our Gold Type Bid columns. Generic Gold is simply flying out the doors of coin shops. So dealers must reload only to face a higher Spot and a higher asking price. Just look at the percentage gains from the previous 6 months. Those dealers that have positioned their inventory well over the past few months are now able to enjoy the fruits of their labor. Powerful demand and percentage gains are also evident among select Deep Mirror Prooflike Carson City Morgan Dollars. Can "CCs" get any hotter? Many of these coins are not being found in the marketplace and so at least one dealer is trying to force them out of hiding with these shocking Bids. His customers, who are patiently waiting to buy, are hoping that he is successful. Silver Commems are also enjoying steady demand and Bid increases this week. Modestly priced Commems, especially in NGC holders, are increasing in MS64 thru MS66. Increased Bids are also being entertained in the Franklin Half Dollar series.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

Rare Coin Market Rides Gold's Coattails Baltimore Show Up Next

The exceptionally strong demand that has been very evident in the Gold Type market has refused to diminish as we approach the end of November. Gold bullion appears solid, trading just below the $450 per ounce level and quickly making new believers that these levels are for real. Dealers tell us that some of their customers are afraid that the United States Dollar is heading lower, and a few believe much lower. Consequently, dealers are facing strong demand for Gold from their regular clients and from many new customers. A few large orders for generic Gold remain unfulfilled and are overhanging the market right now. One dealer in particular is trying to buy 8,000 $20 Liberties in Circ grades. A second order for 200 MS66 $20 Saints is in the process of being assembled. A few well-heeled collector/investors are also trying to buy Mint State Gold by the hundreds from their dealers. This can be quite a daunting task for any dealer. It's not easy filling these orders as supplies have dwindled in recent weeks. Couple this problem with the realization that many collector/investors are not looking to sell their Gold right now. Many of them feel that Gold is strong and they believe it is poised to go even higher. Dealers say there is a genuine shortage of generic Gold at the present time across-the-board for nearly all Gold denominations. One Midwestern dealer says that he has customers looking for Uncirculated $20 Saint-Gaudens and $20 Liberties. Mostly, the Liberties are needed in grades from MS61-63 and the Saints from MS61-64. However, he is receiving some orders for those coins in higher grades as well. Lower grade, Circ Gold is also a mainstay for his customers who are happy to have their orders satisfied. In this atmosphere, a successful Santa Clara Expo concluded with dealers still feeling pretty good about the rare coin market. However, we know that it is getting tougher for dealers to buy coins. The problems they face are now starting to hit their customers. One dealer told us that his customer is frustrated because he has to compete at public auction for some of the better coins that he needs. He is frustrated because his dealer is unable to satisfy his want list and buying at public auction means, most likely, that he will have to pay the very top dollar. The opportunity may come in Baltimore as Bowers and Merena will conduct the December 2004 Baltimore Auction December 2-3. Dealers will also attend the November 29 Richmond Sale by David Lawrence. The Baltimore Coin and Currency Convention December 3-5 will conclude another busy week.

Consequently, the sight-unseen market is extremely active when it comes to Gold and other select coins. Dealers know that they are able to buy and sell certified Gold rather quickly on the electronic dealer trading networks. Our Mint State Gold Bid columns are covered with plus signs this week. This comes on the heels of last week's blast of plus signs. As you can see most Gold denominations are up with many examples increasing by 5 percent or more. That is a considerable increase in just one week's time. Silver and Gold Commemoratives are also making some noise. Select Silver issues are moving higher as dealers push the Bid in an effort to secure the coins they need for their customers. The majority of the increases are also for coins priced below $1,000. Some Gold Commems in this same price range are also pushing higher. Beyond this, much of the market is solid at current levels with a lot of supporting Bids and little apparent weakness, save for late date Walkers and select Proof Singles.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows, and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or bond that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "lt" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XIX No. 49 December 3, 2004 Single copy price $4.00

Baltimore Auctions Realize $14.1 Million
NGC F12 Strawberry Leaf Cent Brings $414,000

The sight-unseen market is continuing to do well mostly because the overall market for rare coins is fantastic. Dealers desperately need material to replenish their inventories and to fulfill standing orders that they have been accumulating. Higher **sight-unseen** Bids are targeting those areas of the market that appear to be somewhat undervalued. Bid increases are taking place for **select** NGC and ANACS certified coins as astute dealers try to take advantage by bargain hunting. Gold Type is certainly at the front of the line with plus signs covering NGC, PCGS, ICG and ANACS certified examples. The need for material is so great that several dealers are now posting sight-unseen Bids for **all** third party grading services on the electronic trading networks. Silver Commemoratives, Morgan Dollars, Peace Dollars, Proof Type and select Franklin Half Dollar Proofs are all entertaining increased Bids. The increases are hitting those coins where demand remains powerfully strong. Late date Walkers in high grade are a completely different story as they continue to soften nearly week after week. Also, GSA "CC" Dollars are weak with some minus signs occurring. There are a number of certified coins that are selling below current sight-unseen Bids at auction. This has been an ongoing event and one where dealers could benefit. Those dealers that are able to buy these bargains can then instantly sell them sight-unseen for a nifty profit. Still, we know that an active market takes a lot of hours of work and so we expect some opportunities to fall through the cracks.

The surging precious metals have ushered in December with a bang. Silver topping $8 per ounce is a very bullish sign and an important ingredient for Bids targeting common date, Silver bullion related coinage. Gold is also enjoying its own strength moving past the $450 per ounce threshold and in the process, taking the Mint State Gold issues along for the ride. Of course some profit taking in these metals is expected by some analysts. Still, the bullish nature of the Gold and Silver market is like a shot of adrenaline for the rare coin market and the Baltimore Expo. Dealers are happy when the metals are increasing because it gets headlines across the business pages, catching the attention of new investors. Many of these investors are interested in a diversification of their investment funds. Consequently they turn towards bullion coins first to grab a piece of the metallic pie. However, coin dealers give them additional information concerning bullion versus rare coins and so it's easy for them to quickly graduate to semi-numismatic Gold and Silver coins. These dealers are letting them know that the rare coin market is strong and prospects for 2005 look equally bright.

We have been reporting about the exceptional need for key and semi-key dates for much of the year. Dealers have told us that the need for them is growing and their inventories have been seriously depleted when it comes to these jewels. Late November and early December finds this need still unsatisfied. Confirmation for this demand is readily seen by the results at recent auctions where record prices for key date coins are taking place. Bids totaling $7.3 million were tendered for the Richmond collection Part 2 November 29 sale conducted by David Lawrence in Baltimore. Interest for key dates was certainly evident by the prices realized and the number of under Bidders also trying to capture some of these numismatic prizes. A similar scenario took place at the $6.8 million American Numismatic Rarities Frog Run Farm collection sale November 30 thru December 1. This auction was also held in Baltimore. We have listed some key and semi-key certified highlights from each sale.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

The VAM 44 Discovery Coin!

In 1963, a young Berkeley engineering student encountered a revolutionary booklet, entitled *Morgan Dollar Varieties* by F.X. Klaes. In this small volume, a previously unknown 7/8TF "Doubled Leaves" variety was among the coins featured. And the rest is history!

The student was none other than Leroy Van Allen.
And the coin? It was the first VAM 44, the "King of VAMs."

And naturally, IT'S IN AN ICG HOLDER!

Peace Dollars Find Buyers At Higher Levels
Rapidly Increasing Bids Yield Quick Profits

The year is winding down and a few dealers are making some strategic moves prior to the conclusion of 2004. Activity in the overall sight-unseen market has slowed down from its hectic pace as dealers take a break to celebrate the holiday season. Some, however, are choosing to try a different approach. It appears that a few dealers are looking to get a jump on some of their competition by increasing sight-unseen Bids for select Peace Dollars. Interest in this usually quiet series has been gradually picking-up. For practically the entire year it has been the Morgan Dollars that have taken most of the buyer's thunder. Yet there's not much happening with Mint State Morgans this week, although Prooflikes and DMPLs are moving. Of course dealers still tell us that strong demand is evident throughout the Morgan series. They also say that several Morgans remain undervalued, such as: 1894-S, 1896-S and 1904-S in MS64 thru MS66. Check out the jump Bid for 1885-S Dollars in PCGS MS64PL, now at $1,100. Many dealers have already updated their final Morgan Dollar Bids for the year. Now they have chosen to wait and see whether or not those Bids will bear any fruit. Meanwhile a few astute dealers are turning their attention to some areas that may have been overlooked. Enter the Peace Dollar series. As a series, it is much shorter with a fewer number of rarities than most other areas of the market. However, in Gem it can be quite challenging to complete a set. Consequently, dealers are trying to locate the more affordable examples for their customers. Gold Commems have had an explosion of Bids this week for NGC and PCGS examples. Dealers have followed their declines in recent weeks and just believe that they are too reasonably priced. This is primarily true for coins at the MS64 and above grade level. Another quiet area, Proof Gold, is the beneficiary of a $7,000 sight-unseen Bid jump for PR65 Type III $20 Liberties. At $55,000 Bid for either NGC or PCGS could this be the beginning of more Bidder attention moving into this area? Discounting remains evident for late date Walking Liberty Half Dollars and select Proof Singles as dealers try to sell some material before the new year. They know how important it is to be in a strong cash position, especially for the major Florida United Numismatists show in Fort Lauderdale January 13-16, 2005.

The majority of dealers continue to be rather bullish about the coin market's outlook for 2005. They are expecting the positive nature of the market to continue. A burgeoning customer base and higher precious metal prices have contributed to this thinking. In addition, only half of the new State Quarter designs have been released to date, translating into five more years of new collectors joining our hobby. New Jefferson Nickel designs along with new colorful Paper Money is also helping to fuel this positive market. It is fair to say that the metals can still prove to be extremely volatile, as witnessed this week. The precipitous decline in Gold and Silver is seen only as profit taking before the year end and not the signal of a bearish market. However, it did put an abrupt stop to the reoccurring plus signs seen for Mint State Gold Type. Unfortunately there are some other concerns about the market even among all its positives. Some dealers believe that Bids have increased so quickly and so sharply that there is great temptation for collector/investors to sell their material far sooner than they would ordinarily do so. It is hard for anyone to turn down a quick profit. Usually buyers of rare coins like to put them away for several years. Profit isn't even the first reason for buying rare coins. The conventional wisdom points to the more fun aspects of the hobby. After all, it takes time, often years to form a complete or nearly complete collection of coins. However, today's collector/investors are offered a chance to secure a quick profit instead, long before they have accomplished their goals. The market balance in the short run could change as buyers now become sellers. Consumers of coins could suddenly become traders of coins. If this trend continues it could also prove to be problematic in the long run as collector/investor goals change. Profit taking is a natural occurrence in any bull market but it is important to keep the enjoyment and challenge factors of our hobby intact. We know that is tempting to cash-in today but as many great collectors have already proven to us time and again, there is an even greater reward that awaits those that fulfill their original numismatic goals.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

"Should be read before a single coin is bought - and read again and again!" -***Coin World***

UNPRECEDENTED SIX-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual™*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

CONTAINS ALL-NEW INFORMATION ON:

- **Gold coins as an economic safe haven**
- Coin conservation services
- **Coin insurance and safekeeping in light of September 11, 2001**
- The latest Internet strategies
- **Digital photography pointers**

and much, much more!

Gold Entices New Collectors
Last Issue For The Year — Happy Holidays

This year is nearly in the books and most dealers that we talk with are extremely satisfied with their sales and results. Many of them credit a strong bullion market. Gold and Silver have performed exceedingly well in 2004 and it's this performance that has helped in giving the rare coin market such a dynamic year. Gold, at $440.80 per ounce has moved 6.8 percent since January 2, 2004, when it was fixed at $412.50 per ounce. However, demand for Gold throughout the year has contributed to solid interest from many buyers. Dealers are saying that a lot of these buyers are new to numismatics that were introduced via the *SS Republic* shipwreck and recovered treasure of Gold and Silver coins. This new segment of buyers has caught the collecting bug from this fascinating story of history seen on television and splashed across the headlines of many newspapers and magazines. Today's strong sight-unseen Bid advances for Mint State Gold Type are mostly the result of orders from the buyers of treasure ship coins. Many of the shipwreck coins were marketed and sold for their beauty, historical significance, condition and rarity. The seeds that were sown earlier in the year are now starting to germinate. The enthusiastic treasure ship coin owners are willing to further their entry and interest into other rare coins. Besides the treasure find, it also helps that Gold bullion has done well and that many believe the future prospects for the yellow metal is favorable. It's this eager group of new collectors that are specifically looking to buy $20 Liberties and Saint-Gaudens and they want them in Mint State condition. One dealer tells us that he has an order for 400 MS66 $20 Saint-Gaudens in NGC holders. Serious demand is also targeting the Type I and Type II $20 Liberty issues. Orders for 20-30 Type I $20 Libs are seen in grades from MS60 thru MS64. At the MS65 level, one dozen examples are needed. The increased sight-unseen Bids for these certified coins has not gone unnoticed but so far, there haven't been that many sellers. The current high buyer is anxiously waiting to be filled.

Silver has performed, percentage wise, even better than Gold. It has increased $1.05 from the $5.79 per ounce level on January 2. Now standing at $6.84 per ounce it represents a 18.1 percent gain. This strong increase is in spite of the precipitous decline that Silver bullion has suffered since last week, falling $1.13 per ounce before rebounding. Similarly, Gold's final 2004 result was also hurt by its $15.30 drop before it regained some strength. Dollars and Type are among the market leaders in December as they have been for much of 2004. Supporting Bids are found throughout the sight-unseen market for Commems, Mercs, Buffalo Nickels and early Walkers. However, the weakness that has hit the late date Walking Liberty Half Dollars is still continuing. Dealers are pushing out of their positions in these coins and trying to get additional funds for other opportunities. Proof Singles are also finding similar selling activity. Dealers know that this is another area of the market that's popular to sell for quick cash. Late date Walkers and most Proof Singles could be repurchased with not too much difficulty. Sight-Unseen Bids for Franklin Half Dollars with Full Bell Lines are now listed on Supplemental Page F. This series remains on the soft side as it has since early in the year. The market in this material is thin and supply is currently outweighing the demand.

Dealers are looking ahead to a productive 2005. Many will be attending the initial major convention and auction of the new year, the Florida United Numismatists show in Fort Lauderdale January 13-16, 2005. Dealers believe that it will be a good year because they expect retail orders for coins to be strong. They tell us that the "retail arms" are obtaining new buyers for rare coins at fast rate. The demand for product is strong and so the concerns of dealers are, understandably, on the buying side. Dealers are out there looking to buy anything that's high grade, low population or rare. A coin or coins that carry any one or combination of these qualifications are receiving strong Bids. Dealers must stay sharp if they are to benefit in this highly charged, competitive climate for rare coins. Many choose to specialize and focus on select areas of the market. This increases their ability to compete and succeed in today's frenzied market. However if one is specialized to the point of ignoring other opportunities, it could have a negative effect on his or her business.

This is the last issue of the *Certified Coin Dealer Newsletter* for 2004. We hope that all of you and your families have a healthy and happy holiday season. The next *CCDN* will be published on January 7, 2005.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.
